

PROTRACT TE301

- Protract TE301 is designed to match vehicle's economic performance and it provides extra miles that keeps you going safely
- Uniform tread wear provides long mileage and good worn noise
- Low rolling noise ensures comfortable driving experience

Features and Benefits

Four main central grooves with narrow shoulder block

For improved grip performance during wet braking, resulting in shorter braking distances and increased safety.

Rib type pattern and solid center line longitudinal ribs

For high rubber volume and stiffer centerline, resulting in optimum mileage and precise handling.

Advanced digital simulation for optimize tread design

To improve footprint pressure distribution, resulting in reduced rolling resistance and fuel economy.
